

Università degli Studi della Basilicata
Scuola di Ingegneria

PROF. Umberto PETRUCCELLI

SCIENTIFIC CURRICULUM VITAE:

Associate Professor (*Transport* sector - ICAR-05) since 2001, formerly Assistant Professor (1986-2001). Professor of "*Transport techniques and economics*" (1994 - 2003), "*Transport planning*" (2003 - 2009), "*Urban and metropolitan transport*" (since 2003), "*Transport basics*" (since 2009).

He worked, as well as research manager, in inter-university national and international research programs and also in research agreements with public institutions aimed at the study of relevant transport issues.

He published many scientific papers on the national and international literature.

His recent research activity has focused on mobility analysis and planning, on operation planning and quality evaluation of transit services by road and dedicated way, on the management of the urban road system, on the assessment of transport externalities.

PROFESSOR'S OFFICE HOUR:

On Wednesday, from 10.00 A.M onwards, by appointment to be taken by email.

Professor's office is on the fourth floor of the School of Engineering (formerly Department Dapit).
