

PROF. ING. ETTORE TRULLI

SCIENTIFIC CURRICULUM VITAE

Ettore Trulli is Associated Professor of “Environmental and Sanitary Engineering” at School of Engineering of University of Basilicata.

He is graduated in Civil Engineering, Hydraulic-Sanitary sector, at the University of Bari in April 1989 (five years course 1984-1989). In the same year he qualified as a professional engineer.

He has a PhD in “Environmental and Sanitary Engineering” in July 1993 at the Polytechnic of Milan (three years course 1989-1992). In June 1994 he win a fellowship for post-doctoral research activity in "Environmental Polluting Control" at the University of Basilicata.

He develops his research activity in the field of the Environmental and Sanitary Engineering: water treatment processes, pollution control in natural water bodies, assessment of anthropic-origin potential pollution on a basin scale, treatment of urban and industrial sludge, urban solid waste treatment and disposal.

He is author of technical and scientific articles published on proceedings of national and international conference and journals.

He participates as a lecturer to many Conferences and Symposiums in Italy and Europe and he has been contributing with his membership to the activities of several national and international scientific and technical associations among which the International Water Quality Association, the National Association of Environmental Sanitary Engineering, Italian Water Works Association.

He contributed to several research programmes financed by the Ministry of University and Scientific Research, the Ministry of Agriculture, the Regions of Basilicata and Apulia, and other public bodies and also to programmes funded by private companies.

He is a lecturer for several courses held at the School of Engineering within the Degree Course of Environment and Territory Engineering. He is the holder of the courses of “Environmental Sanitary Engineering”, “Water Treatment Processes and Management” and "Energy Recovery from MSW" collaborating to the course of “Water Quality Models”.

He teaches at technical professional courses and masters.

PROFESSOR’S OFFICE HOUR:

Scuola di Ingegneria, Potenza, Viale dell’Ateneo Lucano, V° Piano, Studio n. 21

Tuesday: 11:30 - 13:30.

Wednesday: 11:30 - 13:30.
