

Università degli Studi della Basilicata
Scuola di Ingegneria

PROF.Enza Tolla

SCIENTIFIC CURRICULUM VITAE:

Enza Tolla graduated in Architecture at Rome University "La Sapienza" in 1982. Since 1991 she's been a researcher for the scientific department ICAR17_DISEGNO at Engineering School at Basilicata University. She's been holder of courses: engineering drawing, drawing and architectural survey.

The scientific research activity has consisted in studies about the practice and methodology of survey in architecture and landscape. The research results have been presented in national and international conferences and seminars and have been included in essays and articles. Moreover, she has analyzed the cartographic and historical heritage of Basilicata, also in relationship with the representation systems and the graphic codes used in different historical moments. She obtained a PhD in Representation of Architecture and Environment. She is member of the teachers' council of the Doctorate of International Research "Architecture and Urban Phenomenology" XXIV, XXV, XXVI, XXVII e XVIII cycle.
