PROF. Enza Tolla

---

SCIENTIFIC CURRICULUM

Enza Tolla graduated in Architecture at "Università degli Studi di Roma" in 1982. Since 1991 she's been a researcher for the disciplinary-scientific sector "ICAR17-DISEGNO" (ICAR17-Drawing) at the Engineering faculty of "Università degli Studi della Basilicata". She's been the head of the "Drawing", "Architecture Drawing" and "Drawing and Relief" courses. Her research activity has mainly been focused on developing the practice and methodology of relief in architecture and landscape. Her results have been presented in many national and international meetings and have been published in several essays and/or articles. She has also been involved in the analysis of the cartographic and historic heritage of Basilicata region, mainly in relation to representation systems as well as graphical codes used in different historical ages. She's been relator of many thesis in Civil and Environmental Engineering and of several PhD thesis in "Representation of Architecture and Environment". She's been part in the Professors Council of the International PhD "*Architecture and Urban Phenomenology*" (XXIV, XXV, XXVI and XXVII courses). She is currentlu a member of UDI, Unione Italiana Disegno (Italian Union of Drawing).
